CensorNet Email Filtering and Management

CensorNet™ Professional is a **BECTA** accredited Web Content Filtering & Control software solution that provides hundreds of schools with world class content filtering technology at an affordable price point

CensorNet internet filtering is simply installed on your network and will improve productivity, reduce risk and enforce your internet access policies. Our web filters enable you to control access to any web based solution on time, category, by user or workstation.

CensorNet, an innovative new proven solution that filters to eliminate

- Offensive images
- Inappropriate sites
- Viruses, malware, phishing
- Anonymous proxy sites

CC Communications also offer a full **CEOP** service. At CC we have a number of ambassadors who can visit your establishment to offer initial guidance free on internet safety.

Seminars and training events can also be booked . We deliver a full training service for all age of students, governors, teachers, training establishments , local authorities and care homes.

Visit our web site for more information and to see our case studies on **CensorNet**
